Mr. T. O. Andrews  
Chief Project Engineer  
Hammermill Paper Company  
Erie, Pennsylvania 16512

Dear Mr. Andrews:

The well history data and proposed plugging procedures have been reviewed by Mr. William G. McGlade, Environmental Geology Division, Pennsylvania Topographic and Geologic Survey, and myself. We find the report satisfies in detail all of the information originally requested.

The plugging procedure as proposed by David A. Waldran and Associates, Inc. to include the injection of (100) sacks of lime into wells #1 and #3 ahead of the cement squeeze, as requested by Mr. Charles Songer, Oil and Gas Inspector, is approved.

The proposal to remove wellhead equipment 60 days after plugging and the emplacement of a 4' x 4' x 6" slab around each wellhead even with the top of the wellhead stringer flange and an embedded metal marker with pertinent data is in keeping with my requests and therefore approved.

Please notify me of the date plugging procedures will commence.

Sincerely yours,

Carlyle W. Westlund, Chief  
Ground Water Section  
Division of Water Quality

Dear Sirs:

We are sending you one copy of the report showing a history of the three wells on our property and the planned plugging procedure. This report was prepared by David A. Waldoon and Assoc., Inc., Wooster, Ohio.

In addition to the recommendations by Waldoon we plan to inject one hundred (100) sacks of lime into Wells No. 1 and 3 ahead of the cement squeeze. This is at the request of Mr. Charles Songer, Oil and Gas Inspector of the Department of Mines and Mineral Industries.

Please note on page 105.2, par. 9, page 205.2 under Procedure, page 305.2, par. 10, that the wellhead equipment will be removed after "sufficient time". We propose that 60 days after plugging this event should occur.

After the wellhead equipment is removed we will place a 4' x 4' x 6" thick slab around each wellhead even with the top of the wellhead stringer flange and will imbed a metal marker in the cement with the following information:

1. Number of well
2. Latitude
3. Longitude
4. Plugging permit number
5. Date of plugging

Conforming to the legal requirements for plugging a well, we are submitting the necessary forms for a plugging permit. These forms will

accompany Mr. Ziegler's letter. As soon as permission is granted by the Division of Oil and Gas, we will make the necessary arrangements and will notify all parties concerned so that those who wish to be present may do so.

Very truly yours,

HAMMERMILL PAPER COMPANY
